Project Overview

In spring of 2012, Redhill Group was tasked with conducting surveys for three Sonoma County transit agencies; Sonoma County Transit, Petaluma Transit and Santa Rosa CityBus. The project included the development of a sampling plan, onboard data collection of rider contact information, and subsequent telephone surveying using real-time trip mapping to provide fully valid and logical trip summaries that include GIS data for origin, destination, boarding, alighting, and transfer points. The onboard data collection phase was conducted by Dikita Management Services. All other project tasks were conducted by Redhill Group. In addition to GIS data, the telephone survey also addressed access and egress modes, distance to and from bus stops, fare media, discounts, traditional demographics and supplemental information to support Title VI reporting. The surveys also included four operator-specific questions as requested by each operator. This report presents the findings from the Santa Rosa CityBus study.

Communications Summary

Field Survey Communications: Redhill Group coordinated with Santa Rosa CityBus' point of contact, Richard Marcus. Redhill Group first reviewed the methodology of the surveying process with Mr. Marcus. Mr. Marcus then provided ridership and operations information to facilitate the development of the survey sampling plan and the daily scheduling process.

The surveying schedule was provided to Santa Rosa CityBus with announcement information including a sample notice poster for drivers, a sample notice poster for patrons, and sample multimedia messages for Facebook, Twitter, head signs, electronic boards, and customer service center and onboard announcements. These documents are attached as Appendix A: Survey Announcement Documents. A sample badge was also provided to be presented to drivers to help them identify field surveyors. The final field survey dates were established as April 24th through April 27th.

Phone Survey Communications: Redhill Group provided Mr. Marcus with a copy of the full telephone survey instrument and noted that each transit agency was invited to include three custom questions. Mr. Marcus requested four questions addressing: 1) how riders would have made their trip if Santa Rosa CityBus was not available, 2) how often they ride Santa Rosa CityBus, 3) how they would rate Santa Rosa CityBus overall, and 4) selection of the service improvement they would most like to see. Redhill Group also worked with Mr. Marcus to ensure that the fare-type and discount questions were logical given Santa Rosa CityBus' fare system. Design of these questions included two rounds of revisions to ensure that they were clear and logical, and met the needs of both Santa Rosa CityBus and the MTC.

Redhill Group provided a final copy of the phone survey and received approval from Santa Rosa CityBus on April 17th. Mr. Marcus was supportive throughout the pretest process.

Detailed Sampling Plan

The sampling plan was developed to collect completed surveys from 5% of average weekday boardings. Since most riders ride round-trip each day and a significant portion must transfer on each one-way trip, 5% of boardings is assumed to approximate 15% or more of all riders. In addition, a significant portion of these riders must transfer in each direction resulting in four boardings per day. Another factor to be considered is that reported boarding counts used for sampling include all riders regardless of age. Since survey distribution is limited to riders that appear to be 16 years of age or older, this further increases the proportion of eligible riders that are being surveyed.

Because average weekday ridership for Santa Rosa CityBus is approximately 10,250 riders per day spread over 17 routes, the sampling plan was developed at the route level with independent breakouts by time of day. Five percent of 10,250 daily riders equates to 513 completed phone surveys.

The targeted sampling plan is provided below in Table 1: Sampling Plan – Boardings by Route. The total sample increases slightly to 515 due to rounding at the route level.

Table 1: Sampling Plan - Boardings by Route

Route	Avg. Weekday Boardings	% WKDY Boardings	Phone Surveys
Route 1 - Mendocino Ave	737	7%	38
Route 2 - Bennett Valley	618	6%	31
Route 3 - West 9th St	546	5%	28
Route 4 - Rincon Valley	511	5%	26
Route 5 - Santa Rosa Ave	642	6%	32
Route 6 - West 3rd St	430	4%	22
Route 7 - Montgomery Village/Rincon Valley	394	4%	19
Route 8 - Sonoma Ave	441	4%	22
Route 9 - Sebastopol Road	1,028	10%	52
Route 10 - Coddington	736	7%	37
Route 11 - Fulton Road	584	6%	30
Route 12 - Roseland	615	6%	30
Route 14 - County Center	998	10%	50
Route 15 - Stony Point Rd	642	6%	32
Route 17 - Piner Road	636	6%	31
Route 18 - Southeast Circulator	227	2%	11
Route 19 - South City Connector	465	5%	24
Total	10,250	100%	515

A sample size of 515 provides statistical accuracy of + 4.2% at a 95% confidence level for a target universe of 10,250 boardings.

The estimated field response rate was then used to develop the field sampling plan. The estimated projected response rate was based on estimates for three variables:

1. Percent of riders responding to the survey. This is an estimate, based on a previous pretest performed in an earlier task. It was estimated that 45% of the Santa Rosa CityBus local weekday riders will return the survey. Due to the short length of the questionnaire, the projected 45% response rate was estimated higher than normal for traditional onboard surveys. The actual overall response rate achieved was higher at about 53%.
2. Percent of surveys that appear complete (i.e. the rider provided a 10 digit phone number). We estimated that 80% of the responses would appear to be complete (although not necessarily valid). The overall rate was 99%.

- Percent of valid surveys with valid phone numbers that would participate during the second stage of the process. We estimated that we should collect 2.5 times the total number of completed phone surveys needed. For example, if the goal was to complete 50 valid phone surveys, then the goal was to collect 125 apparently complete field survey records for subsequent calling.

Using the response rate calculations above, we estimated the following:

- Total passenger trips = 5% of 10,250 is approximately 513 valid surveys needed
- Total number of field surveys to collect is approximately 1,283 surveys (2.5 times 513)
- Total number of passengers needed to intercept is approximately 3,564 (1283/45%/80%)

Table 2: Expected Response Rates

Variable	Estimated	Actual
Sample Size (Boardings) ^(a)	100%	100%
Response % ^(b)	45%	54%
Validated surveys (%) ^(c)	80%	99%
% Valid - Goal ^(d)	100% x 45% x 80% = 36%	100% X 54% x 99%= 53%

- Total boardings. Each passenger over the age of 16 is offered a survey. There is no random sampling involved in the distribution of the instruments.
- Response rate refers to the expected percentage of actual returned surveys from everyone who was offered a survey, which is a percentage of boardings since everyone is offered a survey.
- Validated surveys are a percentage of the returned surveys that appear to have valid phone numbers.
- The goal for percentage of apparently valid field surveys needed to provide for telephone interviewing. In other words, this factor is used to determine the quantity of surveys needed (qualified by field observation) to help predict the number of valid surveys that will be able to be reached by phone and provide a full geocodable trip. This rate was used to determine how many passengers must be approached in order to arrive at the necessary number of apparently valid surveys that will become part of the final field survey sample. In this example, if 1,283 surveys are needed, then 1,283 / 36%, or 3,564 passengers need to be approached.

Once the overall sample size was determined, a stratified sampling method was used to estimate the number of surveys needed for each route. The target surveys for each route were estimated using the percentage of average passenger trips per route and distributed in proportion to ridership across the following time periods.

AM PEAK	5:00AM to 8:59AM
MIDDAY	9:00AM to 2:59PM
PM PEAK	3:00PM to 6:59PM
NIGHT	7:00PM to 9:00PM

Note that the target number is higher because no partial trips were scheduled.

Table 3: Field Sampling Targets - Route

Route	Target Surveys
Route 1 - Mendocino Ave	97
Route 2 - Bennett Valley	79
Route 3 - West 9th St	71
Route 4 - Rincon Valley	66
Route 5 - Santa Rosa Ave	81
Route 6 - West 3rd St	56
Route 7 - Montgomery Village/Rincon Valley	48
Route 8 - Sonoma Ave	57
Route 9 - Sebastopol Road	131
Route 10 - Coddington	93
Route 11 - Fulton Road	76
Route 12 - Roseland	76
Route 14 - County Center	127
Route 15 - Stony Point Rd	81
Route 17 - Piner Road	79
Route 18 - Southeast Circulator	28
Route 19 - South City Connector	61
Total	1,307

Table 4: Field Sampling Targets - Time of Day

Day Part	Target Surveys
AM Peak	320
Midday	536
PM Peak	404
Night	47
Total	1,307

The trips were scheduled by route and time of day. In order to logistically schedule trips efficiently, assignments were created to follow the driver’s paddles when possible. Trips in the AM were typically sequential trips that pulled out of the garage. Trips that could not originate out of the garage were scheduled in block order from common transfer points, but usually at the beginning of the trips. All surveys were collected on whole trips, rather than partial trips, to avoid any bias that might result if boardings and/or alightings for some portion of the trip were systematically excluded.

Survey Instruments

Field Survey: The field survey instrument for Santa Rosa CityBus was identical to the survey employed in the second round of pretest of AC Transit with the only changes being the change of operator name and logo. The survey was printed on 8x10 inch double-sided card stock with one side in English and the other side in Spanish. A smaller number contained Chinese on the reverse side. The survey included six questions, graphics to aid the passenger with directions on completing and returning the survey, and a description of incentives to support participation.

The questions included:

- The rider’s current route
- Origin-type
- Destination-type
- Name
- Phone number and type (mobile/home/work), and
- Best week-part (weekday or weekend) and time of day to reach them

The bottom two inches of the survey was perforated to allow the participant to detach and save. It had space for the route and date to help the passenger remember where they were intercepted, and to remind them of the drawing.

The survey also included a unique identifier (serial number) to track every survey to a date, route, trip, vehicle, and surveyor. The surveys were organized in decks and the decks included up to 25 surveys each. Each survey within a deck is sequentially organized.

A copy of the final survey is attached as Appendix B: Field Survey Instrument.

Telephone Survey: The telephone survey instrument was derived from the telephone survey instrument used in the second phase of the AC Transit survey, but modified to incorporate modifications requested by MTC, and to bypass asking respondents about confirmation of boarding and alighting points, since these points were not captured electronically in this survey.

The modifications to the survey included:

- Adding: dining/coffee, escorting others (children, elderly), and maintenance (dry-cleaning, picking up repaired car, etc.) as additional precodes for the origin and destination type questions.
- Adding Petaluma Transit, Sonoma County Transit, Santa Rosa CityBus, and County Connection to all transit agency questions and adding precoded route questions for each of these agencies.
- Updating all transit agency precoded lines to reflect changes in route designations.
- Including two language questions, asking riders if they speak a language other than English at home, and if yes, which language that is.
- Adjusting potential transfer agency names and routes to incorporate agencies intersecting Santa Rosa CityBus that did not intersect AC Transit.

In addition to revisions made to the core survey instrument, the survey included four new custom questions requested by Santa Rosa CityBus addressing:

- How riders would have made their trip if Santa Rosa CityBus was not available,
- How often they ride Santa Rosa CityBus,
- How they rate Santa Rosa CityBus overall, and
- Selection of the service improvement they would most like to see.

The survey instrument first confirms the respondent's origin and destination types. It then asks if they had any intermediate stops between their origin point and transit boarding point. This sometimes identifies a new, more valid origin-type based on new information such as stopping to get coffee, to drop off cleaning, etc. The interviewer then captures the rider's access mode to their first transit boarding point as well as the

minutes (if walked) or miles (if non-pedestrian mode) from their origin to the boarding point.

The interviewer then determines if the transit trip where the rider was initially surveyed, was the first leg of their transit trip, or if they were transferring from another transit trip. The survey allows up to four transit segments prior to the trip where they were surveyed, as well as four segments following this segment of their trip. For each trip segment, the respondent identifies the relevant transit operator and route, and the boarding and alighting points are captured.

The rider is subsequently asked about their egress mode and minutes or miles from their last transit alighting point to their destination. Riders that do not have work or school as part of their trip are also asked if they work or are students so that it is clear whether each respondent works, is a student, is both or neither. Their work and school locations are also captured if this was not part of their trip. If the respondent does work or go to school, and this was not part of their transit trip, then they are asked if they went to work or school that day before or after the transit trip where they were surveyed.

All riders regardless of work and student status are asked what time they left home prior to the trip where they were surveyed and when they returned home after this trip.

Finally, respondents were asked about their fare media type and discount, if any, the four customized operator-specific questions, demographics and Title VI questions including:

- If they have a driver's license,
- The number of people that live in their household that work,
- The number of drivable vehicles available to people living in their household,
- The year they were born,
- If they are of Hispanic or Latino origin,
- Race (White, African American, Asian, American Indian or Alaska Native, native Hawaiian or Pacific Islander, or other),
- If they speak a language other than English at home, and if so, which language,
- Income, and
- Gender (observed, not asked).

A copy of the telephone survey is attached as Appendix C: Telephone Survey Instrument

Data Collection - Field Surveys

Recruiting, Hiring and Training Field Surveyors: A total of eight bilingual-Spanish surveyors were locally recruited by Monroe Staffing and trained by Dikita. Surveyors were trained at the offices of Sonoma County Transit as they were hired to survey for Sonoma County Transit and Petaluma Transit in addition to Santa Rosa CityBus. During the training session, Sonoma County Transit provided surveyors with a tour of the facilities as well an opportunity to board a non-revenue service bus as a part of training. Sonoma County Transit management also spoke to the group about safety, routes and general bus operations.

There were standard minimum job qualifications for the surveyors as given below:

SURVEYOR QUALIFICATIONS

Minimum age, 18

Minimum Education – HS Diploma or GED

Must have a car or other means of reliable transportation that provides the ability to get you to your report location

Must be reliable, attendance and punctuality are critical

Must be able to continuously observe and legibly record information

Must be able to recognize where they are at all times while riding the bus

Must be self-motivated, have a positive attitude, and be customer service oriented

Must be assertive without being a nuisance

Must be presentable and professional

Must not exhibit any extremes in hair style, clothing, jewelry or makeup

Surveyors are expected to wear a plain white or solid colored shirt or blouse (no tank tops, no t-shirts, no logos, nothing printed on the blouse/shirt); neatly ironed pants, khakis or jeans (no holes), no shorts and no short skirts. Rubber soled shoes are recommended, flip flops are not allowed

Must be able to ride without motion sickness or incontinence

Must have a watch; using a cell phone to tell time could be cumbersome, and cell phones should not be used while working, unless you are communicating with your DIKITA Survey Supervisor

Bilingual a plus

The field data collection project management and supervisory team were supplied by Dikita. A total of two seasoned supervisors staffed the project on a daily basis. The supervisors were highly skilled in transit data collection routines and had significant field experience with similar projects.

Recruitment: In order to obtain the best team possible, recruiting began as soon as possible for temporaries with the above qualifications. The target was to interview total of 12 prospective team members and hire eight. However, only eight people were interviewed and all eight were eager to work. We continued to recruit and hired additional interviewers during the course of the survey. All but one of the survey team members was bilingual.

Training: A 4.5 hour training session was conducted at on April 16, the day before the survey began. Basic training included training on the purpose and objective of the study, the procedures and techniques for collecting the surveys, bus operations, safety, transit terminology and practices, and general employment information. Surveyors practiced the necessary daily procedures, learned how to catch the correct bus, practiced onboard procedures, how to greet passengers, completing trip logs and ending the job. The supervisors also received additional training as customary when adapting to the current agency's operating conditions.

In addition to the classroom training, a tour of the facility and a typical bus was provided by Sonoma County Transit.

The field surveying training manual is attached as Appendix D: Field Training Manual.

Data Collection Procedure: Surveyors boarded the bus at the beginning of the trips and distributed surveys to each passenger boarding the bus. If a passenger refused, the surveyor tracked the refusal by marking it in the trip log. Once a passenger completed a survey, the surveyor collected it before the passenger alighted. The passenger was also advised of the incentive for completing the survey. The incentive was very successful in enticing passengers to complete the survey, providing their name and phone number.

Each trip had a pre-printed log form and a designated envelope. The surveyor used the log form to track all surveys distributed and any refusals. At the end of each trip the surveyor tallied the number of surveys distributed and refusals, and safely secured all returned surveys in the envelopes provided. If the surveyor encountered any problems or issues that they felt may have had an effect on the completion of the survey, such as bus breakdown or a major traffic delay, they described the incident on their trip log.

As a quality control measure, all surveyors reported to the garage prior to being dispatched to the field. They met with their supervisors, picked up their material and assignments, and were paired with their drivers. In cases where they did not depart from the garage with the driver, they were shuttled to their beginning location. With the excellent cooperation of the dispatch and operations staff, this system worked well.

There were instances where the bus was directed to another route in emergency situations. The supervisors at the garage were notified and adjustments were made to get the surveyor back to the garage.

Near the early evening of each day, the supervisors took the surveys to the local FedEx and scanned the completed surveys to transfer to the Dikita main office for processing. Each morning the data was retrieved by office staff and processed. After processing and validating the data, the scanned forms and Excel formatted data details were sent to the Redhill Group to complete the phone surveys and corresponding trip geocoding.

Results: The target number of total surveys to be collected for the telephone survey was estimated at 2.5 times the amount of the final survey expectations plus 1.5 percent extra resulting in a system-wide target of 1,307. The total number of surveys actually collected was 1,739, which exceeded the target by 33 percent. There were many instances of oversampling, which is to be expected especially on interlined routes. Only one route was under the Redhill Group sampling plan target, with all 16 of the other routes exceeding the sampling target.

The field survey response rate was 54%. The response rate was calculated as the percentage of total of apparently valid surveys divided by the total boardings on surveyed buses. Said another way, 54% of everyone who boarded the bus completed a survey that contained information and phone numbers that appeared correct to send to the phone call phase.

The combined total boarding count on the trips we surveyed was 3,220, or approximately one quarter of all average weekday boardings. The table below displays other statistical measures. A total of 42% of the boarding passengers refused to take the survey while 58% accepted the survey. Of the surveys distributed, 94% were processed, discarding 6%. After further processing, 99% were sent to CATI. Both the summary and detailed results are provided in the following tables.

Summary of Distribution and Results

Table 5: Field Survey Distribution and Refusals

Total Boarded	Total Refused	Total Distributed	Total Discarded	Total Processed	Total Sent to CATI
3,220	1,338	1,882	122	1,760	1,739
100%	42%	58%	6%	94%	99%

Table 6: Field Survey Results - By Route

Route	Expected	Collected
1	97	127
2	79	123
3	71	74
4	66	107
5	81	120
6	56	67
7	48	82

Data Collection - Real-Time GIS Telephone Surveys

Surveyor Recruitment: Interviewers were hired through targeted outreach efforts to the University of California at Irvine and California State University at Long Beach to hire upper-level and graduate students. At the University of California at Irvine the MURP (Master’s in Urban and Regional Planning) program, engineering, and transportation, were contacted for referrals. At California State University at Long Beach the Geography program and GIS Certification programs were approached for qualified candidates. A special effort was made to recruit multi-lingual candidates.

Candidates were interviewed using rigorous standards to yield the most technologically qualified candidates who also possessed superior communications skills. A group of 25 interviewers was hired. The group was supplemented by qualified senior interviewers from Redhill Group staff which yielded a total complement of 30 interviewers that were available to conduct the in-depth personal interviews with riders.

The knowledge, skills and abilities of the team included:

- Six Master’s candidates in urban planning/geography
- Five geography majors with either baccalaureates or upper division status
- Eleven with specific GIS training including five GIS certifications
- Fourteen upper division level civil engineers

Additional language capabilities included:

- Spanish
- Mandarin
- Cantonese
- Vietnamese
- Japanese
- Indonesian
- Urdu
- German

Training: The selected staff received a 20-hour training program which consisted of classroom and practical training. The training included the following modules:

- A comprehensive review of research methodology
- Project overview and goals

- Project location information
 - Demographic
 - Cultural
 - Economic
- Transit system overview:
 - Modes and services
 - Transfers
 - Fares
 - Routes
 - Day parts
- Methodology
- Interviewing protocol
- Spatial perspectives
- Mapping
- Data integrity
- Privacy and confidentiality
- Customer service

Interviewers were required to spend a minimum of 12 hours on practical application using geographic/spatial relations software to demonstrate their proficiency in conducting route related interviews with transit riders.

Throughout the duration of the project quality assurance staff observed and reviewed all data collection efforts to ensure the highest level of data integrity.

File Receipt and Loading: Files were provided by Dikita on a daily basis (weekdays) with information collected over the previous time period with a delay from field data collection ranging from one to three business days. Upon receipt of the files, they were converted into Redhill’s internal CATI system format and added to the calling list for the project.

Survey Scheduling: Calling was conducted across all seven days of the week and all records were called within 48 hours of being loaded into the calling list; most were contacted within 24 hours. However, many of the potential respondents were not able to be reached for up to three weeks and required several call attempts. If an answering machine was reached on a first call attempt, a message was left indicating the purpose of the call and providing Redhill Group’s toll-free number in case the respondent preferred to proactively call us to complete the survey.

A summary of calling statistics is detailed in Table 10: Call Statistics.

Table 10: Call Statistics

Status	Records	Percent
Complete	618	36%
Refused	186	11%
Answering Machine/Voicemail	457	26%
No Answer	153	9%
Disconnected	147	8%
Wrong Number	75	4%
Other - not reached	103	6%
Total	1739	100%

Data Collection Procedure: Prior to contacting respondents, surveyors familiarized themselves with major streets, landmarks, and transit agencies in the surveyed region by reviewing the area in mapping software. Figure 1: Complete County Connection Route, displays the complete bus route on which the sample respondent was surveyed.

Once familiar with the region, surveyors used Redhill Group’s proprietary Computer Aided Telephone Interviewing (CATI) software and mapping software to administer the survey.

Surveyors first requested an address or intersection for each geographic location (origin, boarding, transfer, alighting, and destination). If the surveyor was unable to locate the

address or intersection provided, multiple steps were taken to secure a geocodable point, including asking for the spelling of cross streets and nearby landmarks.

The images that accompany this section are representative of the process used for the Santa Rose CityBus survey, though the route shown is from Central Contra Costa Transit Agency's County Connection bus system.

Surveyors used information about access and egress modes as well as travel time or distance between points to assist in searching for origin/destination points with respect to boarding/alighting points. This assured that access and egress mode, time, and distance logic and accuracy. In the completed survey sample included in this section, the respondent walked 10 minutes from her home to the first boarding point at the Downtown Berkeley BART station. Figure 2: Search for Origin Location near Boarding Point, illustrates the process of identifying the origin point by searching for an address and comparing distance to the known boarding point.

To further ensure the accuracy and logic of geographic and spatial information, surveyors confirmed that the respondent's boarding and alighting points fell along the routes they took. Figure 3: Transfer Point from BART to Bus Route, illustrates the identification of the transfer point between BART and the surveyed bus route by displaying both the bus route and the reported transfer point on the map.

Figure 4: Alighting and Destination Points, illustrates the confirmation of the respondent's alighting point and destination by displaying the bus route, the reported alighting point, and the reported destination address on the map.

When a geographic point (origin, boarding, transfer, alighting, or destination) was located, surveyors coded it within the mapping software. This coding included the location of the point, which point on the trip the location corresponded to (origin, boarding, transfer, alighting, or destination), and whether the point is on the surveyed route, a transferred route, or no route.

Once all relevant points along the respondent's trip had been recorded, surveyors reviewed the entire trip to ensure a logical progression from origin to destination, and clarified points with the respondent when necessary. Figure 5: Complete Trip Map, illustrates the respondent's entire trip, including transfers. The trip follows a logical progression from Berkeley to Concord.

After confirming the accuracy and logic of the points recorded, surveyors captured demographic and attitudinal information in the CATI software as described in the telephone survey instrument in Appendix C: Telephone Survey Instrument.

Figure 1: Complete County Connection Route

Figure 2: Search for Origin Location near Boarding Point

Figure 3: Transfer Point from BART to Bus Route

Figure 4: Lighting and Destination Points

Quota Tracking and Management: The number of completed surveys was tracked by line and daypart throughout data collection. When insufficient progress was being made towards a quota goal, the following steps were taken to ensure the achievement of sampling targets.

First, if a number was disconnected or reached and determined to be a wrong number (no one by that name at the number provided), the original survey record was reviewed to determine if the original number provided could be off due to legibility or ambiguity for one or more of the digits provided. If it appeared possible that the number could be different, all feasible variations were attempted.

If all phone numbers for a particular line were exhausted and the target had still not been met, then all survey records where a transfer to this line was feasible were reviewed to determine if this route was used to reach or continue their trip from the route where the respondent was surveyed. If this was the case, and there were “extra” surveys for the other route, the record was converted to the desired route, adjusting the survey so that the desired route was the survey route, and the original route and any other transfers were converted to the appropriate preceding or subsequent trip segments. Since this is a complex and labor intensive process, it was only employed when it appeared that data collection would fall significantly short of sampling target goals.

Data Cleaning and Weighting

Data Weighting:

Data weighting was performed to avoid over or underrepresentation of specific routes or dayparts where surveys were completed in excess of the desired target level.

The weights were calculated by dividing the ridership for each route and daypart by the number of completed surveys in the route and daypart combination. For example, the number of boardings for Route 1 in the AM peak for an average weekday was 214. Dividing this by the 11 completed surveys with riders on trips beginning in the AM peak period for Route 1 produces the weight for this Route-daypart cell of 19.455 as shown in the upper left hand cell of Table 11: Weights.

Table 11: Weights

	AM PEAK	MIDDAY	PM PEAK	EVENING
Route	5-9:59AM	10AM-2:59PM	3-6:59PM	7-9PM
Route 1	19.455	16.850	23.125	NA
Route 2	12.636	18.143	12.059	9.500
Route 3	8.625	19.500	70.667	NA
Route 4	11.000	9.238	16.300	4.200
Route 5	17.571	16.471	19.545	11.500
Route 6	10.545	19.625	29.200	3.667
Route 7	6.933	12.077	22.167	NA
Route 8	13.375	19.556	15.778	16.000
Route 9	19.385	20.091	16.556	17.500
Route 10	9.688	16.579	82.333	18.000
Route 11	17.111	15.714	20.900	NA
Route 12	13.364	27.556	21.900	NA
Route 14	22.727	15.286	18.500	23.000
Route 15	17.333	18.500	18.833	NA
Route 17	14.300	17.800	20.200	23.000
Route 18	9.200	12.444	6.273	NA
Route 19	19.500	17.273	22.571	NA

Data Cleaning and File Preparation:

All data cleaning was conducted by staff that had first-hand experience collecting MTC data to assure the deepest understanding of the surveying process, survey instrument, and logical trip progression. All surveys underwent multiple phases of cleaning to assure all survey data was complete and all trips followed a logical progression.

Each survey was reviewed by a quality assurance team member for four primary criteria to ensure the logic and accuracy of the captured geographic information.

1. Boarding and alighting points must be located along the appropriate bus route.
2. All points must be labeled with their position along the trip. Labels include Origin, Boarding, Transfer, Alighting, and Destination.
3. The distance between the respondent's origin point and first boarding point as determined by the mapping software must be consistent with the access mode and the distance or walk time reported by the respondent during the survey. Similarly, the distance between the respondent's last alighting point and destination point as

determined by the mapping software must be consistent with the egress mode and distance or walk time reported by the respondent during the survey.

4. Each point must have a complete address or set of cross streets recorded to allow for accurate future geocoding.

Through custom programming, the final data file was reviewed for systematic errors which were either corrected or flagged for additional research or a callback. In the few cases where the cleaning process revealed the need for additional information or clarification from a respondent, the respondent was called back and the revised or supplementary data was collected and added into the geographic, CATI, or combined data file as appropriate.

The data is provided in two separate files, the CATI survey data is provided with a single record for each respondent with 235 fields for all questions which are detailed in the survey presented in Appendix C: Telephone Survey Instrument. The GIS data is provided with one record for each physical location to facilitate use of the data file to more easily load the data points. The CATI survey data is provided in an Excel file labeled "SRCB12 CATI DATA.xlsx." the GIS data file is provided in an Excel file labeled "SRCB12 GIS DATA.xlsx."

Notice to Drivers: Customer Onboard Survey

To:

From:

Date:

Between April 24th-27th, Santa Rosa CityBus will be conducting an onboard survey of its passengers to gather on its services. The information that is collected in individual surveys is confidential and the survey results in aggregate will be used to plan services to serve our customers.

On behalf of Santa Rosa CityBus, Dikita Enterprises, a subcontractor of Redhill Group, Inc., will be collecting names and phone numbers of passengers who agree to participate in an in-depth phone survey at a later date. Surveying will take place throughout the service day during the noted surveying dates. Interviewers will either board buses at the garages or at stops throughout the system. They will also assist passengers in filling out surveys if assistance is requested.

Interview staff will be easily identifiable. They will be displaying badges designating them as “surveyors” (sample below). Interviewers who are wearing badges are not required to pay a fare while riding the bus.

Interviewers should not interfere with the regular operation of the route. Please notify your supervisor immediately if you have any questions or encounter a problem.

We value feedback from our customers and appreciate your help in making this project a success.

Sample Surveyor Identification:

Gigi Ann Quiggle
Surveyor

Notice to Patrons: Customer Onboard Survey

How are we doing?
Your opinion is important to us!

Santa Rosa CityBus is conducting a survey with our customers who are riding the buses between April 24th - 27th.

*Your participation
will help plan services
to better serve the community.*

Each survey takes a minute to complete and all information is confidential.

When you are asked to participate, we hope that you can take the time to share your opinions with us.

Thank you for your help!

Notice to Patrons

We are suggesting that the website, Facebook page and/or Twitter, if used, inform passenger of the survey.

Suggested text:

GOOD EVENING/MORNING/AFTERNOON, THIS IS _____ AND I AM CALLING TO COMPLETE THE SURVEY YOU RECENTLY STARTED ON <<OPERATOR>> IN ORDER TO HELP US IMPROVE TRANSIT SERVICES IN THE BAY AREA.

IS NOW A GOOD TIME FOR YOU TO ANSWER A FEW QUESTIONS ?

1. OK, WE WOULD LIKE TO GET MORE DETAILED INFORMATION ABOUT THE TRIP YOU MADE ON <<DAY>>, THE <<DATE>> WHICH INCLUDED RIDING ON <<OPERATOR>>, ROUTE <<ROUTE>>.

YOU INDICATED ON THE SURVEY THAT YOU WERE COMING FROM <<ORIGIN-TYPE>> AND GOING TO <<DESTINATION-TYPE>>. IS THAT CORRECT ?

COMING FROM . . .

- 1. WORK
2. BUSINESS APPOINTMENT
3. YOUR HOME
4. SOCIAL OR RECREATIONAL
5. SHOPPING
6. SCHOOL (K-12) (STUDENT ONLY)
7. COLLEGE OR UNIVERSITY (STUDENT ONLY)
8. AIRPORT (AIRLINE PASSENGER ONLY)
9. MEDICAL/DENTAL
10. DINING/COFFEE
11. ESCORTING OTHERS (CHILDREN, ELDERLY)
12. MAINTENANCE (DRYCLEANING, PICKING UP REPAIRED CAR, ETC.)
13. OTHER

OTHER LINE = 250

2. GOING TO . . .

- 1. WORK
- 2. BUSINESS APPOINTMENT
- 3. YOUR HOME
- 4. SOCIAL OR RECREATIONAL
- 5. SHOPPING
- 6. SCHOOL (K-12) (STUDENT ONLY)
- 7. COLLEGE OR UNIVERSITY (STUDENT ONLY)
- 8. AIRPORT (AIRLINE PASSENGER ONLY)
- 9. MEDICAL/DENTAL
- 10. DINING/COFFEE
- 11. ESCORTING OTHERS (CHILDREN, ELDERLY)
- 12. MAINTENANCE (DRYCLEANING, PICKING UP REPAIRED CAR, ETC.)
- 13. OTHER

OTHER LINE = 251

3. YOU INDICATED THAT YOU ARE BOTH COMING FROM <<ORIGIN-TYPE>>
AND GOING TO <<DESTINATION-TYPE>>.

IS THAT YOUR ROUND-TRIP? OR A ONE-WAY TRIP?

[IF "ROUND-TRIP" GO BACK TO Q1 (VIA LASTQ) AND RE-ENTER CORRECTED ANSWERS.

IF "ONE-WAY" TRIP: PROVIDE EXPLANATION WHY THIS IS LOGICAL.]

4. CAN YOU PLEASE TELL ME THE ADDRESS OR THE CLOSEST INTERSECTION TO
<<ORIGIN-TYPE>> ?

[GEOCODE LOCATION]: 4O_ADDRESS/INTERSECTION

[LOCATION CAPTURED?]

- 1. YES
- 2. NO

5. CAN YOU PLEASE TELL ME THE ADDRESS OR THE CLOSEST INTERSECTION TO
<<DESTINATION TYPE>> ?

[GEOCODE LOCATION]: 5D_ADDRESS/INTERSECTION

[LOCATION CAPTURED?]

- 1. YES
- 2. NO

SKIP AFTER Q5 GO 7

6. DID YOU, IN FACT, GET ON <<OPERATOR>>, <<ROUTE>> AT
<<BOARDING INTERSECTION>> ?

- 1. YES
- 2. NO

SKIP AFTER Q6 IF Q<6> EQ 1 THEN GO 8

7. AT WHICH INTERSECTION DID YOU GET ON THE <<OPERATOR>>,
<<ROUTE>>?

[GEOCODE BOARDING LOCATION]: 7BNEW_INTERSECTION

[LOCATION CAPTURED?]

- 1. YES
- 2. NO

SKIP AFTER Q7 GO 9

8. AND DID YOU GET OFF <<OPERATOR>>, <<ROUTE>> AT
<<ALIGHTING INTERSECTION>> ?

- 1. YES
- 2. NO

SKIP AFTER Q8 IF Q<8> EQ 1 THEN GO 10

9. WHAT INTERSECTION DID YOU GET OFF THE <<OPERATOR>>, <<ROUTE>> ?

[GEOCODE ALIGHTING LOCATION]: 9ANEW_INTERSECTION

[LOCATION CAPTURED?]

- 1. YES
- 2. NO

10. DID YOU STOP ANYWHERE ELSE ON YOUR WAY FROM <<ORIGIN
TYPE>> TO YOUR <<DESTINATION TYPE>> ?

[IF YES, THIS BECOMES THE NEW ORIGIN OR DESTINATION, DEPENDING
ON ITS PROXIMITY TO BOARDING OR ALIGHTING.]

- 1. YES
- 2. NO

SKIP AFTER Q10 IF Q<10> EQ 2 THEN GO 14

11. WAS THAT BEFORE OR AFTER YOU RODE THE <<OPERATOR>>, ROUTE
<<ROUTE>> ?

1. BEFORE - [NEW ORIGIN]
2. AFTER - [NEW DESTINATION]

12. WHAT WAS THAT STOP ?

1. WORK
2. BUSINESS APPOINTMENT
3. YOUR HOME
4. SOCIAL OR RECREATIONAL
5. SHOPPING
6. SCHOOL (K-12) (STUDENT ONLY)
7. COLLEGE OR UNIVERSITY (STUDENT ONLY)
8. AIRPORT (AIRLINE PASSENGER ONLY)
9. MEDICAL/DENTAL
10. DINING/COFFEE
11. ESCORTING OTHERS (CHILDREN, ELDERLY)
12. MAINTENANCE (DRYCLEANING, PICKING UP REPAIRED CAR, ETC.)
13. OTHER

OTHER LINE = 252

13. MAY I HAVE THE ADDRESS OR INTERSECTION OF THAT STOP ?

[GEOCODE LOCATION]: 13ONEW_ADDRESS/INTERSECTION OR
13DNEW_ADDRESS/INTERSECTION

[LOCATION CAPTURED?]

1. YES
2. NO

14. OK, PLEASE TELL ME ABOUT YOUR COMPLETE TRIP FROM <<ORIGIN-TYPE>>
TO <<DESTINATION-TYPE>>, INCLUDING THE NUMBER OF BUSES,
BART LINES, OR OTHER TYPES OF PUBLIC TRANSIT YOU USED.

[LISTEN FOR: 1) # OF DIFFERENT PUBLIC TRANSIT LEG FOR ONE-WAY TRIP
2) AGENCY NAME AND LINE FOR EACH LEG IN SEQUENTIAL ORDER
3) ACCESS MODE TO FIRST TRANSIT BOARDING POINT
4) EGRESS MODE FROM LAST PUBLIC TRANSIT LEG TO DESTINATION]

SURVEY and
DATA COLLECTION TRAINING
MANUAL

Conducted For

SonomaCountyTransit

**SURVEY AND
DATA COLLECTION TRAINING MANUAL**

This guide is designed to answer any questions you may have about why you're here, what we expect of you, how to do your job, and to familiarize you with the materials you will use to accurately complete your assignment.

GENERAL INFORMATION

Who is Dikita and what is their relationship to SonomaCounty Transit(SCT)?

Dikita Enterprises, Inc. dba Dikita Management Services (DMS). DMS has conducted market research and data collection projects for transit agencies all over the US for more than 20 years. Our projects have included bus, light rail, and commuter rail.

The **SonomaCounty Transit, or SCT** as it is locally known, is the primary bus system in the county, and operates service to the communities in these zones from south to north:

Sonoma Coast and [Russian River](#); Central Sonoma County ([Highway 101 Corridor](#)); and [Sonoma Valley](#). SCT also operates an inter-county route to [San Rafael](#) in [Marin County](#), providing connections to [Golden Gate Transit](#) and [Marin Transit](#) services to [San Francisco](#) and the [East Bay](#), and within Marin County, as well as a route serving [Sonoma County Airport](#) north of Santa Rosa.

Who do you work for?

You are employees of Monroe Personnel Service, LLC. NOT OF SCT. DMS has contracted with Monroe Personnel Service for your services.

Why is this type of data collected?

All passenger transit agencies are required to report their performance including ridership and other statistical and financial information to the Federal Transit Administration. The FTA uses this data to apportion grants; and state and local government uses this same data to assist them in service planning and improvement.

SURVEY AND DATA COLLECTION TRAINING MANUAL

Project Description

Although the specific daily procedures are discussed elsewhere, your basic job involves boarding the buses at specific locations (usually at the garage or at a relief point, with some minor exceptions), and handing out surveys to all the passengers **getting ON** the bus; collecting completed surveys; and recording the number of passengers who refuse surveys.

When will the data be collected?

Data will be collected on routes operating in Sonoma County between the hours of 5:00AM and 7:00PM as follows:

- Tuesday April 17, 2012 - Thursday April 19, 2012 Sonoma
- Monday April 23, 2012 – Petaluma
- Tuesday April 24, 2012 – Friday April 27, 2012 – Santa Rosa

There is a possibility that we will work The County Connection the week of April 30th.

Each surveyor will normally have a 4-8 hour work assignment each day. Some workdays may be shorter or longer; and some assignments will be split between AM and PM. **We will not work weekends.**

Surveyors

Each of you will participate in collecting this data. Your title is Surveyor. You will ride buses handing out surveys to all the passengers **getting ON** the bus; collecting completed surveys; and recording the number of passengers who refuse surveys. Your work is the most important part of the project because without the accuracy of your counts, your attention to detail and daily punctuality the ridership data would be inaccurate or incomplete. We hope you keep that in mind as you conduct these counts.

The ideal surveyor is someone who records data accurately, who is flexible, reliable, eager to work, available anytime, prompt and who even arrives extra early. *We often refer to this individual as an "A" performer.* Recording data accurately and being prompt and reliable are the top three characteristics everyone who works on this project must possess.

SURVEY AND DATA COLLECTION TRAINING MANUAL

Before describing what you will actually do during the survey, it is important to first explain some general rules and requirements. These are things that you should keep in mind as you prepare to be involved with this project.

What do we expect of you?

Minimum age, 18

Minimum Education – HS Diploma or GED

Must have a car or other means of reliable transportation that provides the ability to get you to your report location

Must be reliable, attendance and punctuality are critical

Must be able to continuously observe and legibly record information

Must be self motivated, have a positive attitude, and be customer service oriented

Must be presentable and professional

Must **not** exhibit any extremes in hair style, clothing, jewelry or makeup. Surveyors are expected to wear a plain white or solid colored shirt or blouse (**no** Tank Tops, **no** T-shirts, **no** logos, **nothing** printed on the blouse/shirt); neatly ironed pants, khakis or jeans (**no** holes), **no** shorts and **no** short skirts. Rubber soled shoes are recommended, flip flops are not allowed

Must be able to ride without motion sickness or incontinence

Must have a watch; using a cell phone to tell time could be cumbersome, and cell phones should not be used while working, unless you are communicating with your DIKITA Survey Supervisor

Training

You will be paid for attending this classroom training ONLY if you successfully complete the training class, and successfully complete at least one assignment.

SURVEY AND DATA COLLECTION TRAINING MANUAL

DIKITA Survey Supervisors

There will be a DIKITA Survey Supervisor on duty during all shifts. Your DIKITA Survey Supervisor will meet you at the garage to supply you with your work assignments and materials, and to collect any paperwork.

Although the DIKITA Survey Supervisor on duty may not be present during your entire shift, he/she will spot check regularly to resolve any problems that may arise. Your DIKITA Survey Supervisor is the person you should talk to regarding any problems. Your DIKITA Survey Supervisor may ride with you from time to time to review your work and ensure that you are following the required survey procedures. You will always report to the garage to begin your shift. You may or may not pull out with your bus or bus driver.

Punctuality and Absenteeism

It is essential that you report to work at least 15-20 minutes prior to your scheduled **Start Time**, and that you meet your bus as scheduled; you will be paid for this time. If you fail to show up or are late, it will be noted on your record and will affect your job security. Those who fail to report on time more than twice may be dismissed. If you are **late three times** during the project, you will be terminated. If you **are absent without proper notification more than once**, you may be subject to disciplinary measures, including termination. If you have difficulty making your scheduled assignment, you must notify your DIKITA Survey Supervisor within 24 hours prior to your scheduled **Report Time**. If you are sick the day you are scheduled, you must notify your DIKITA Survey Supervisor immediately.

Audio Devices

The use of iPods, MP3 players, CD players, or any other distractions are disallowed. Your DIKITA Survey Supervisor is authorized to take these instruments and return them at the end of the assignment or at the next scheduled meeting. Violation of this rule may result in disciplinary action.

Distractions and Alertness

Often passengers will want to converse with you. Although, we do not want to appear inhospitable, it is important not to be distracted from doing your job

SURVEY AND DATA COLLECTION TRAINING MANUAL

accurately. Please refrain from carrying on extensive conversations with anyone, including the bus operator, friends or passengers.

In addition to being distracted by people, you may be surprised at how easy it may be to fall asleep during periods of slow activity. You will still be responsible for recording departure and/or arrival times at **Time Points** even if there is no activity. If you find yourself falling asleep and cannot continue, get in touch with your DIKITA Survey Supervisor and let him/her know you cannot continue. You cannot continue working if you cannot stay alert. You will not be penalized for being proactive. You will, however, be penalized if you have been reported asleep while on duty. It's better to make the work up at a later time than to inaccurately record data.

Use of Cell Phones

Use of cell phone while working is prohibited, unless communicating with your DIKITA Survey Supervisor or for emergency purposes. **Cell phones should be programmed to vibrate only while on the bus.**

Personal Breaks

Longer assignments may have built in meal breaks. Take your break when the operator takes his/hers. Onboard a bus, the operator may or may not take a formal break and if he/she does, it may not be more than 10 minutes. Ask him/her up front when you leave the garage. Bathroom breaks can be taken at times when the operator takes breaks. You should also get this information up front. Remember, the bus operator is the captain of the ship and he can make your assignment easier if you are courteous and cooperative.

Other Rules to Remember

- Don't give passengers directions or answer questions about the bus or its schedules. It is not your job. Refer them to the bus operator.
- Don't sit in a seat if there are no seats available for paying passengers
- Don't ever help passengers with their strollers or anything they carry on or off the bus. Though your inclination is to be helpful, there are liability issues associated with these actions
- Don't bring anything onboard that is against safety and security rules.
- Don't read a book, play a game, or do anything that distracts you from your task at hand, even though you may not pick up or let off any

SURVEY AND DATA COLLECTION TRAINING MANUAL

passengers for several stops in a row. You will be required to record time points. It is important that you refrain from doing things that distract your attention from the bus's arrival at the next stop

- Don't leave personal items in your seat or leave them unattended. Keep them to a minimum and keep them with you at all times. We advise women not to bring their purses as it is easy to lose them while working.

TERMINOLOGY/GLOSSARY

Some terms we frequently use are defined below. Please become familiar with them.

Arrival Time – The time the bus arrives at a stop

Assignment – A surveyor's schedule of work for the day

Block – A bus or trains' schedule of work for one day; the schedule of all routes and trips that a particular bus completes in one day of operation. A block may have several routes, trips and drivers.

Boarding Location – It is a bus stop or transit station where a passenger starts their trip or **gets on** the bus

Bus Stop - Pre-defined location for passengers to board and/or alight the bus, typically at the curb, or in a median, sometimes a Park-n-Ride or Transit station

Cross Street – Is the street that the bus is intersecting; i.e. Fourth Avenue and Main Street, Main Street is the Cross Street. When referring to an intersection, the cross street is listed second.

Deadhead (Miles and Hours) - The miles and hours that a transit vehicle travels when out of revenue service. Deadhead includes:

- Leaving or returning to the garage or yard facility
- Changing routes
- When there is no expectation of carrying revenue passengers

Departure Time – The time the bus leaves the bus stop

**SURVEY AND
DATA COLLECTION TRAINING MANUAL**

Direction – The direction of a route; for example, north, south, east, or west. Sometimes the direction is referred to as inbound or outbound. A route that goes in a loop is said to go clockwise or counterclockwise

Dispatcher – the person at the garage who gives the drivers there assignments and tells them which bus they are driving. He or she is the central point of communication with the drivers in the field and in the garage.

End Location – The place, usually a garage or dispatch location where a surveyor completes their assignment. This may or may not be where you get off the bus

End Time – The **time** a surveyor will stop distributing surveys and recording data at the end of their assignment

Flag Stop – When a customer hails an approaching bus; this is similar to hailing a cab a major metropolitan city.

Passenger – An individual at least 10-years old who is on board, boarding or de-boarding a revenue service vehicle. This excludes operators, transit employees and contractors

Pullout – The time the bus pulls out of the garage

Pull In – The time the bus pulls into the garage

Relief – a driver or surveyor who relieves another driver or surveyor during the normal duty of a block. In other words, if a bus is out for 18 hours, it may have 2 or 3 relief drivers. Since we are following the driver, we may have 2 or 3 relief surveyors, each working 6-8 hours.

Report Time - The time a surveyor will report to work for their assignment; pay usually begins at this time.

Report End Time - The time the surveyor is officially off the clock; pay usually ends at this time.

Report End Location – The place where you will hand over your paperwork to your DIKITA Survey Supervisor, the garage in mostly all cases.

Report Location – The place a surveyor reports to work for their assignment; The garage in mostly all cases.

Route - The geographical path followed by a bus from start to finish for a given trip. A route may have many runs

**SURVEY AND
DATA COLLECTION TRAINING MANUAL**

Route Number – The number assigned to a specific route. Look for this number to locate your bus

Run -A schedule of bus trips that are considered an operator's assignment for the day. A run has many trips. For survey purposes, a run may be your assignment. A run may have several routes.

Run Street – Is the street that the bus is traveling on; i.e. Fourth Avenue and Main Street, Fourth Avenue is the Run Street. This is the most important concept you will learn. When referring to an intersection, the run street is listed first.

Trip - A one-way movement of a bus from the beginning of a route to the end of the same route. A trip has many bus stops

Show Up Time –The time a surveyor will report to work for their assignment; also referred to as **Report Time**

Start Time – The **time** the bus officially either leaves the garage if pulling out. If not pulling out of the garage, the start time is the time it leaves from the bus stop at a relief point.

Trip Envelope – The envelope containing your *Trip Cover Sheet* for each trip

Vehicle Number – A unique number painted on the outside of the bus, used for identification.

What do I need to do my job?

You will need the following in order to complete your assignment:

- Watch (you must provide yourself)
- Your Backpack
- Your Assignment Sheet
- Your Trip Envelope
- Your Trip Cover Sheet
- Photo ID
- Badge (supplied by transit Dikita)
- Deck of Surveys
- Pencils
- A Clipboard

DATA COLLECTION TRAINING MANUAL**

INTRODUCTION TO MILITARY TIME

It is important to understand how to convert standard to military time. Note that the chart below shows Midnight as 0000 **not** 2400

Regular Time	Military Time		Regular Time	Military Time
Midnight	0000		Noon	1200
1:00 a.m.	0100		1:00 p.m.	1300
2:00 a.m.	0200		2:00 p.m.	1400
3:00 a.m.	0300		3:00 p.m.	1500
4:00 a.m.	0400		4:00 p.m.	1600
5:00 a.m.	0500		5:00 p.m.	1700
6:00 a.m.	0600		6:00 p.m.	1800
7:00 a.m.	0700		7:00 p.m.	1900
8:00 a.m.	0800		8:00 p.m.	2000
9:00 a.m.	0900		9:00 p.m.	2100
10:00 a.m.	1000		10:00 p.m.	2200
11:00 a.m.	1100		11:00 p.m.	2300

An easy way to remember military time is to remember that the morning is just as you know it, i.e., 11:00 is 1100 (eleven hundred hours). The afternoon requires you to add 12 to the time. For example 1:00 PM is 1 plus 12 or 1300 (thirteen hundred hours) and 6PM is 6 plus 12 or 1800.

UNDERSTANDING YOUR ASSIGNMENT SHEET

Your Assignment Sheet contains the information you need, to know when and how to work. The assignment sheet contains the following information:

- Surveyors Name
- Assignment Number
- Assignment Date
- Route Number(s)
- Run Number (Disregard)
- Block Number
- Report Time (Showup Time) and Location

SURVEY AND DATA COLLECTION TRAINING MANUAL

- Start Time
- Schedule Description (Start and/or End Exceptions, Meal Breaks, etc.)
- End Time and Location
- End Work Instructions
- Pay Time

Where do I report each day?

Some of your assignments will begin and/or end at the garage; others will begin and/or end in the field. Your DIKITA Survey Supervisor will provide individual instructions, and arrange transportation for those that do not begin and/or end at the garage. In that case, we will ride with the driver if he is being relieved or relieving another.

If for some reason you are unable to come to work you must immediately

Call your DIKITA Survey Supervisor Anita at 773-814-5295.

It is **CRITICAL** that you notify your DIKITA Survey Supervisor as early as possible if you cannot report for work.

What do I do when I arrive?

You should immediately find your DIKITA Survey Supervisor, sign in, verify your name and the assignment, date, start and end times, pick up your material. Synchronize your watch with the DIKITA Survey Supervisor's watch. The DIKITA Survey Supervisor will assist you in locating your bus. Your bus will display the route number and the route name as well as a unique vehicle number.

Be aware that bus drivers sometimes leave early. For this reason you should report to work by your scheduled report time ready to head directly to the bus. Visiting with other surveyors, and trips to the vending machine or restroom should be made before you report for your shift.

If your assignment does not begin at the garage, your bus will be at a specific bus stop at a specified time. You will either be leaving the garage with your driver, or receive directions on how to take a bus from the garage to get to the exact bus stop where your work will begin. The dispatcher will tell you which bus or vehicle number to look for. It is important that you know your assignment each day. Keep your Assignment Sheet handy.

If you must catch the bus at a stop, we will adjust your report time to allow you to catch a bus or ride to get to your start location.

SURVEY AND DATA COLLECTION TRAINING MANUAL

It is very important that you board the bus to which you are assigned. Remember that data collected on a bus other than the one to which you are assigned is of no value to this survey, and you will be deemed as not following instructions.

To make certain that you are boarding the right bus, show the driver your assignment sheet to verify that the *Block Number*, the *Route Number*, and the *TripTime* agrees with your assigned trip times.

After you have found the right bus, verify the bus number. The bus number may be seen in several places on the exterior of the bus. The bus number will usually be a four digit number.

Check In with Driver - Gaining the cooperation of the bus driver will greatly help you in conducting the surveys. When you are boarding the bus, politely introduce yourself, and explain who you are.

Be sure to wear your identification badge where it can easily be seen. **You will not be provided with passes; your badges and will serve as your identification and fare.**

The best seat to conduct the survey from is a seat located on the same side as the driver, opposite side of both the front and back doors. While it is to your advantage to obtain this seat, not getting it does not excuse you from completing your work accurately. If someone is in the ideal seat; take an available seat mid to the front and conduct the survey from there until the side seat becomes available. Note that you do not have a right to any particular seat and that Surveyors who approach passengers sitting in the "ideal" seat will be disciplined.

Take your seat and complete the following information for your assignment on the Trip Cover Sheet:

- Vehicle Number
- Beginning Serial Number of Deck 1

What do I do?

SURVEY AND DATA COLLECTION TRAINING MANUAL

As passengers board the bus hand them a pencil and a survey from the top of the Deck. If a passenger refuses to take the survey, record a "tick" mark in the box labeled "Refused Survey Tickmarks" on your Trip Cover Sheet. Collect pencils and completed surveys from passengers before they get off the bus.

At the end of your trip in the box labeled **Ending Serial Number** under Deck 1, record the serial number of the next survey in your deck. If you hand out all surveys in a deck, then record the serial number of the last survey handed out in that deck. Open a new deck and record the **Beginning Serial Number** of that deck in the box under Deck 2 on your Trip Cover Sheet.

Count the number of surveys completed and record that number in the box labeled **# of Surveys Enclosed**. Place the completed surveys with the Trip Cover Sheet on top in the Trip Envelope.

ONBOARD SAFETY

While onboard any bus, please note the following for a safer and more enjoyable trip:

- Use seat backs and handrails while walking through a moving bus
- Watch your step when boarding and de-boarding the bus
- Be sure to step over the gap between the bus and curb
- Wear shoes with rubber soles
- Never attempt to board or exit a moving bus

FREQUENTLY ASKED QUESTIONS

What if the bus breaks down?

If your bus breaks down and another is sent to relieve it,

- Record the time of the break down and the length of the delay on the Trip Cover Sheet in the **Comments** section
- Collect all of your materials
- Call your DIKITA Survey Supervisor
- Board the relief bus and continue with your surveying
- Always follow the driver; if he goes back to the garage, you go with him
- Record the vehicle number of the relief vehicle on your Trip Cover Sheet

**SURVEY AND
DATA COLLECTION TRAINING MANUAL**

What if I miss a trip?

If you miss your assigned bus or an assigned trip because you're assigned bus does not come to the location it was supposed to, or because the bus you rode to get to your *Report Location* is so late that you cannot make your connection, call the DIKITA Survey Supervisor for instructions.

What if I need help during my assignment?

Call the DIKITA Survey Supervisor.

What if the relief Surveyor does not show?

Call the DIKITA Survey Supervisor and let them know as soon as possible. You will be given the option to remain on the bus and continue working or to get off.

What if the Surveyor I'm relieving is not on the bus?

Identify the surveyor you are relieving before you get on the bus. If the surveyor is not there, it may be the wrong bus....verify the *Block Number* and *Vehicle Number* with the bus driver. If it is the correct block and vehicle number, get on the bus and complete your assignment, but make a note of the problem.

What do I do if is raining?

You are expected to report for your assignment regardless of weather conditions.

What if I have an emergency?

If you are on assignment and have an emergency that will affect the completion of your assignment, immediately contact the DIKITA Survey Supervisor.

If you have an emergency and are not going to be able to come to work, please call the DIKITA Survey Supervisor as soon as you know you are going to miss your assignment, EVEN IF IT IS DURING THE NIGHT.
